

## Educational visit to manroland

Specialist teachers from all over the world visit Offenbach

Exciting insights were given to specialist teachers for printing at manroland. As part of the PrintPromotion tour of the VDMA, the international group visited Offenbach on 7 June 2011.

The participants of the PrintPromotion tour of the VDMA were a really mixed group of guests: They came from South America, India, Thailand, Indonesia, Malaysia, Russia, Slovenia, Poland, Croatia, Ukraine, Nigeria, Egypt and even the Philippines. After a comprehensive factory tour through the foundry, production and assembly departments, they were given special lectures about standardization and colour management as well as inline finishing. The group was particularly enthusiastic about the Print Technology Center (PTC).

The visitors engaged in lively discussions with the specialists from manroland; as usual the print samples were a coveted souvenir. It was a relaxed atmosphere in which the guests from all over the world were really enjoying themselves.
